

RENAL ACCESS, MASSES AND NEXT GENERATION

STONE TREATMENT

THIS ACTIVITY HAS BEEN APPROVED FOR AMA PRA CATEGORY 1 CREDITS™

DAY 1

SATURDAY, FEBRUARY 24, 2024

7:30 AM	Registration, Continental Breakfast
8:00 AM	Welcome Roshan Patel, MD & Pengbo Jiang, MD
8:10 AM	Pre-course/Questions: Kahoots
8:20 AM	Ultrasonography: Fundamentals and Knobology Rony Kampalath, MD
8:50 AM	Pre-procedural planning: CT-based – (tracts/angles/stent size and stone measurements) Pengbo Jiang, MD
9:20 AM	Renal Mass Biopsy – Ultrasound Guided in the Office Jaime Landman, MD
9:50 AM	Ultrasound Access for Kidney Stones: Prone and Supine Tom Chi, MD
10:20 AM	Break
10:30 AM	Fluoroscopic Access: Seeing is Believing Ralph Clayman, MD
11:00 AM	Percutaneous Access: Does Size Matter? TBD
11:30 AM	Holmium vs Thulium Laser Lithotripsy: When and How Roshan Patel, MD
Noon – 1PM	Lunch
1:00 PM	Panel Discussion and Case Presentation: Complications of PCNL/URS: Prevention, Recognition, and Resolution Moderator: Peggy Pearle, MD Case Presenters: Roger Sur, MD; Duane Baldwin, MD; Jaime Landman, MD
1:45 PM	Billing PCNL and URS in the Age of ICD-10 and 2020 CPT Michael Ferragamo, MD
2:15 PM	2:15 PM Break and move to dry lab
2:30 PM	Dry Labs
3:30 PM	Break and Technology Fair
4:00 PM	Dry Labs
5:00 PM	Adjourn

Dry Labs: Ultrasonography: All Things Renal (8 people per station – ½ hr per station)

- 1 Renal Ultrasound: Reviewing the Basics: Know the Knobs | Rony Kampalath, MD & Laura Rojas (ultrasound technician)
- 2 Renal Ultrasound: Live models – Find the stone | Roger Sur, MD & Duane Baldwin, MD
- 3 Renal ultrasound: Percutaneous access | Tom Chi, MD & Pengbo Jiang, MD
- 4 Renal ultrasound: In-office biopsy and renal mass porcine mode | Jaime Landman, MD & Roshan Patel, MD

DAY 2

SUNDAY, FEBRUARY 25, 2024

7:00 AM Continental Breakfast and post-didactic Kahoots/questionnaire

Laboratory Session: Cadavers

7:30 AM First cadaver session

9:30 AM Break

10:00 AM Second cadaver session

12:00 PM Adjourn

Cadaver Labs

8 cadavers available with complete PCNL equipment set-up / 4 persons per cadaver. After the first two hours, the participants would rotate from fluoroscopy to ultrasound room and vice versa.

Fluoroscopy

Table 1 PCNL with fluoroscopy – prone | Peggy Pearle, MD & Sohrab Ali, MD

Table 2 PCNL with fluoroscopy – prone | Jaime Landman, MD & Resident

Table 3 PCNL with fluoroscopy – prone | Roshan Patel, MD & Zachary Tano, MD

Table 4 PCNL with fluoroscopy – prone | Duane Baldwin, MD & Resident

Ultrasonography

Table 5 PCNL with ultrasound – prone | TBD

Table 6 PCNL with ultrasound – prone | Pengbo Jiang, MD

Table 7 PCNL with ultrasound – prone | Tom Chi, MD

Table 8 PCNL with ultrasound – prone | Roger Sur, MD
